

## Premium Foam Lance with Gerni Fitting

CCCFLG

### Key Features

- This kit includes the connection fittings for Gerni
- 1 Litre HDPE Chemical Resistant Bottle
- Callibrated bottle with markings for 100ml – 900ml
- Premium Quality Full Brass Body
- Air Flow Adjustment Knob
- Simple Fan Adjustment
- PTFE Tape Provided for Fittings

The Premium Foam Lance is an extremely popular method of applying vehicle washing detergents/shampoos for professionals and enthusiasts alike. They are used in conjunction with a pressure washer and they apply a thick blanket of foam which allows for greater sit time on the vehicle, thus providing for greater penetration and emulsification of the soil on the vehicle's surface. This process uses less water and less chemical than most other wash methods and contributes to safer wash methods, thus reducing the possibility of scratches & swirl marks on your vehicles surface when used in conjunction with premium quality wash media.

Pfeiffer Car Care's Premium Foam Lance is the perfect piece of equipment for providing the highest quality of foam for all of your vehicle washing requirements. When used with a quality foaming detergent/shampoo, such as Koch Chemie's Gentle Snow Foam (Gsf), the Foam Lance will produce a layer of highly lubricious foam which will cling to the surface of your vehicle as it softens and emulsifies the soil and road grime that is present on your vehicle.

The Premium Foam Lance has a premium quality brass body which provides for a longer operational life than many other foam cannons on the market and sits atop an HDPE bottle which is calibrated in 100ml increments and is highly chemical resistant. There is an adjustable air intake control knob on top of the lance to control the foam quality, as well as an adjustable fan control on the foam lance outlet.

The Foam Lance comes standard with a 1.25mm orifice, however if you have a less powerful domestic pressure washer, you may require a smaller orifice to produce the quality of foam that you require. The good news is that Pfeiffer Car Care's Premium Foam Lance includes an extra 1.1mm orifice as part of the package for you to use if required.
